

USER:

- Busy parents

PROBLEM:

- It is hard for parents to find a quick recipe for their child
- Babies have a strict diet and is restricted to ingredients and age range.
- Most recipe websites are either too general, or catered to a specific age group. Also, they do not inform parents what is approapriate for their child.

SOLUTION:

- Parents are able to use filters (age and ingredients) to find the right recipe for their children.
- Parents are also able to use filters, and tick the ingredients they have at home to know what are the recipes they can do.

MVP: Render all the recipes CRUD

FURTHER 1:

As the wirframes

FURTHER 2:

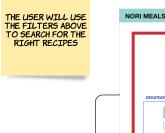

Add Allergies filter, parents are able to say what ingredients they do not want in the recipe

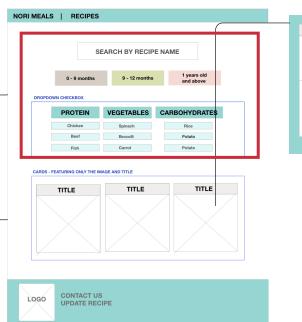

FURTHER 3:

Further information will be provided for parents, to educate them on the nutrition values or what they should look out for at different age range

FURTHER4:

Parents can share comments, like or download the individual recipes..

INDIVIDUAL CARD WILL LEAD EACH OWN INDEX THERE WILL BE 3 DIFFERENT FILTERS.
